I am available the 18<sup>th</sup>, I just won't be able to take my mandatory field operation guidance training. Since they scheduled those 4 sessions in the same week (silly planning, when your intended audience is field personnel).

Fran,

I told Raj he should consider this "on hold" for now until you speak with Dana Tulis, Tito, etc.

You may want to let HQ know that the chamber test is estimated at almost 4x the cost of the field test.

Raj and Lockheed Martin were planning to conduct the field sampling on March 18. I said the Region still supports the field approach

and its possible it will merely be postponed (?).

**Melissa**, if for some reason March 18 is still doable, I cannot attend now due to a meeting set up today with the Philly Health Dept on my JTLewis Site. We've struggled to get this to happen and it looks like March 18 is the only good day.

Didn't look like you could make it either so.....just in case, could you check with Dennis? If not, maybe I can ask Dom or Raj Sharma or someone else who was out there? You never know what may happen with HQ discussions between now and the end of the week.
